Front-End Development 95%

UI Implementation 88%

Responsive Design 85%

Performance Optimization 80%

E-COMMERCE PLATFORM REDESIGN

A complete front-end redesign focused on improving customer experience, mobile usability, and overall website performance.

+28%

Increased mobile conversion rate

+35%

Improved page load speed

Delivered fully responsive user interface.

DEVELOPMENT WORKFLOW

A structured approach that ensures projects are delivered efficiently while maintaining quality, consistency, and user satisfaction.

01 Research & Planning

Defining architecture, analyzing target audiences, and mapping technical requirements.

02 UI Implementation

Translating design specs into functional components using clean, responsive code structures.

03 Testing & Optimization

Rigorous debugging, cross-browser audits, and deep performance fine-tuning.

PERFORMANCE METRIC

Measured results demonstrate the effectiveness of development decisions and their impact on user experience and business goals.
