Suranjana Ghosh

Senior Frontend Engineer specializing in React, TypeScript & Micro-Frontend Architecture

Bengaluru, India | Born 23/12/1997 | +91 7980883574
suranjanaghosh2312@gmail.com | **LinkedIn** | **Github**
I can provide my own visa/work permit for Germany within 5-8 weeks. I am serving my notice period.

TECHNICAL SKILLS

Senior Frontend Engineer (5+ years of project experience); **Frontend:** TypeScript/ JavaScript | React.js | HTML5 | CSS3 | Material UI | Bootstrap | React i18next; **Architecture & Design:** Micro-Frontends | Module Federation | Nx | Monorepo | Atomic Design | Design Systems | Storybook | Reusable Components; **State & APIs:** Redux | TanStack Query | REST APIs | Axios | GraphQL | Node.js | Express.js; **Testing & Quality:** Jest | React Testing Library | Playwright | Cypress | ESLint | SonarQube; **Build, Cloud & DevOps:** Vite | Webpack | Docker | Azure | AWS | Azure DevOps | CI/CD | Git; **Security & Accessibility:** MSAL | OAuth | RBAC | WCAG 2.1/2.2 | ARIA; **AI & Automation:** GitHub Copilot | GitHub Copilot CLI | Claude AI | Custom AI Agents | n8n; **UX & Performance:** Figma | Responsive Web Design | Lazy Loading | Frontend Performance Optimization; **Leadership:** Team Leadership | Mentoring | Agile/Scrum

WORK EXPERIENCE

03/2024 – today

Senior Frontend Engineer
Clinisys, Bangalore, India
Project: Clinisys Laboratory System (CLS) - Laboratory management software used by 3,000+ organizations across 42 countries.

- Lead frontend architecture and a 5-member engineering team across a 19-app Nx micro-frontend platform, delivering React/TypeScript solutions across 5 core product areas.
- Standardize micro-frontend architecture and shared UI patterns, reducing code duplication and improving application performance by 20%.
- Build independently deployable modules with Module Federation, TanStack Query, Node.js, Atomic Design and reusable design-system components.
- Implement MSAL/OAuth security and React i18next localization supporting 3 global regions and 4 languages, alongside WCAG 2.1/2.2 accessibility.
- Automate development, testing and PR reviews with GitHub Copilot CLI, Claude AI, custom AI agents and n8n, supported by Azure DevOps CI/CD and containerized workflows.

Technologies used: React.js | TypeScript | Node.js | Micro-Frontends | Module Federation | Nx | TanStack Query | Material UI | Atomic Design | Storybook | React i18next | MSAL | OAuth | WCAG 2.1/2.2 | Jest | React Testing Library | Docker | Vite | Webpack | Azure | Azure DevOps | CI/CD | Git | GitHub Copilot CLI | Claude AI | Custom AI Agents | n8n

03/2023 – 02/2024

Frontend Engineer
Promantia, Bangalore, India
Project: Decathlon India Retail Applications - Retail applications supporting 129 stores and approximately $480M in annual sales.

- Delivered 2 business-critical retail applications with React 18, TypeScript, Node.js and Express.js for returns, refunds and employee discounts.
- Reduced rendering time by 30% through lazy loading, component-tree optimization and frontend performance improvements.
- Built Express REST APIs and restructured Redux state management, improving frontend data-fetching efficiency by 20%.
- Partnered with UI/UX designers and business analysts to validate Figma designs, translate business workflows into technical solutions and define backend API contracts.
- Accelerated development and quality checks with Claude AI, GitHub Copilot, n8n, Jest, React Testing Library, Cypress and SonarQube.

Technologies used: React 18 | TypeScript | JavaScript | Redux | Node.js | Express.js | REST APIs | GraphQL | Atomic Design | Material UI | Jest | React Testing Library | Cypress | Docker | Vite | SonarQube | GitHub Copilot | Claude AI | n8n | Figma

04/2021 – 11/2022

Software Engineer
iMerit, Kolkata, India
Project: GULP - AI data annotation platform supporting 5,500+ employees across 60+ countries.

- Led frontend development of GULP, building React.js interfaces and annotation tools for enterprise AI/ML data workflows.
- Built reusable React components and integrated REST APIs with Axios for high-volume annotation processes.
- Modernized legacy jQuery functionality into React, reducing duplication and improving maintainability.
- Resolved production issues affecting large datasets and daily annotation workflows, improving application stability.
- Mentored 2 new developers through technical troubleshooting, code reviews and frontend development best practices.

Technologies used: React.js | JavaScript | Axios | REST APIs | Bootstrap | jQuery | HTML5 | CSS3 | Git | Agile

EDUCATION

04/2015 – 07/2020

BSc, Mathematics, Physics and Chemistry
University of Calcutta

LANGUAGE SKILLS

English (C2) | Bengali (Mother tongue) | German (A1, currently learning)

HOBBIES

Painting | Traveling | Social Work
